NON-FINAL ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8-2-07 has been entered.

The terminal disclaimer of 8-2-07 has obviated the previous rejection of Obviousness-type double patenting. However, an update search yields a relevant reference, which necessitates the following rejection(s).

Claims 3, 5, 6, 8-11, 13, 17 and 18 are pending.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 1624

2. Claims 9, 10, 13, 17 and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by **Bernardelli et. al.** (Pub. No. US 2002/0198198 or PP'198).

On page 24 of PP'198, the compound in paragraph [0764] (or *8'-Chloro-5'-[2-(carboxymethyl-amino)-ethoxy]-spiro[cyclohexane-1-4'-(3',4'-dihydroquinazolin)-2'(1'H)-one hydrochloride]*) reads on the instant formula (I) with the following substituents:

- a. R^1 is Chloro;
- b. R^2 is a substituent from group (c), or an alkyl group substituted with –
 NR^aCOOR^{4a} , wherein R^a is CH_3 , and R^{4a} is hydrogen.

The disclosed compound can also treat many diseases including AIDS, and thus, the reference teaches the instant pharmaceutical composition as well as the method of use.

The applied reference has a **common inventor** (but **different assignee**) with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Claim Objections

3. Claim 5 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the

Art Unit: 1624

claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 5 depends on claim 18, but recites “-NR'SO₂R⁷” as a substituent on R³ which is not the same as “-NR'SO₂R⁶” recited in claim 18 since R⁶ and R⁷ do not have the same scope.

4. Claims 3, 6, 8 and 11 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
